

# Opportunities for Change in Crisis: Human and Infrastructure Evolution for 21st-Century Collections

Deborah L Paul @idbdeb, Erica Krimmel, Dirk Neumann, Megan McCuller, Gabriela Hogue, Laurence Livermore, Shelley James, Christopher Marshall #SPNHC2020 #NATHIST2020

SPNHC and ICOM NatHist Virtual 2020 Symposium: Envisioning Collections  
Management for the Evolving Biodiversity Data Lifecycle 23 June 2020

# Our Symposium Story Overview

Deborah Paul, et al   ☐ Human and Infrastructure Evolution for 21st-Century Collections

G Hogue & M McCuller   ☐ The Dynamic Role of Collections Managers

Sylvia Orli   ☐ Collection Management in a changed digital landscape: progress and challenges for the US Herbarium with a newly digitized collection

Anton Güntsch   ☐ Better Together: Merging our knowledge about people, places, collections, and taxonomies with Wikidata

Elycia Wallis   ☐ Interpreting data quality, or how collections can approach providing useful and useable data

T Mayfield-Meyer   ☐ Data Management Strategies for the Extended Specimen

# Advancing the Digitization of Biological Collections

## Human and Infrastructure Insights

**Data and Technology Leadership**

**Communication**

product management, sharing horizontally

**Duplication of Effort**

people, taxon names, localities, ...

**Data Fitness, Data Loss**

fitness, management, attribution

**People and Capacity Development**

**Collection and Digitization Metrics**

what to measure?

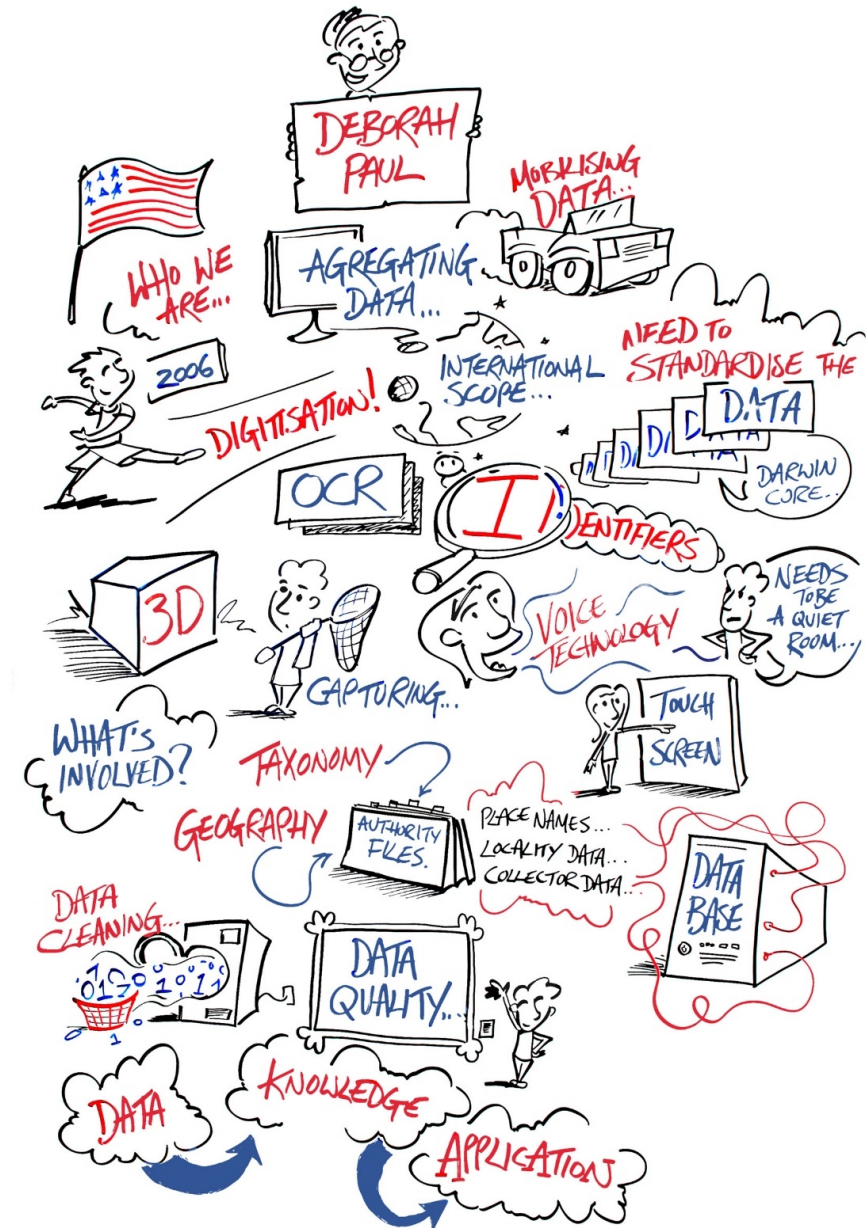

# Vision Evolution

KNOWN KNOWNS	analogies, lateral thinking
KNOWN UNKNOWN	build hypothesis, measure, iterate
UNKNOWN KNOWN	brainstorming, group sketching
UNKNOWN UNKNOWN	research, exploration

@GoodStickLtd

- is critical to all national research infrastructure *and for multidisciplinary research*

- Ongoing commitment to **training and career progression**, not only by the facilities and projects but also by the universities and research institutions that **harness them**, is essential.

# Skills Needs: two vantage points

## Researcher point-of-view

- I usually **manage data in Excel** and **it's terrible**.
- I'm **organizing GIS data** and it's **a nightmare**.
- My advisor insists that we store **50,000 barcodes in a spreadsheet**, not good.
- I **want to use public data**.
- I **work with faculty at undergrad institutions** and **want to teach data practices**, but need to learn it myself first.
- I'm interested industry **and companies are asking for data analysis experience**.
- I'm **trying to reboot my lab's workflow** to manage data and analysis sustainably.
- I'm **re-entering data over and over again by hand – help!**
- I have **overwhelming amounts of data**.
- tired of feeling **out of my depth** on computation.

## BIO Centers IT Staff View

- **man** pages
- **automated** file-naming / renaming
- OpenRefine (<http://openrefine.org>)
- look at **large text files**
- **concatenate** files together
- computer **directory structure**
- **write a text file** not in Word
- the idea that you can **parse** a file
- the **shell** commands, piping, grepping
- which **tool** do we need to use to do an analysis
- introducing the idea of **csv files (delimited)** files
- you can **formulate questions** for your data and computer
- **preparing data for analysis** (such as formatting, trimming)
- **awareness of data and metadata standards**, and how to map data to them or make them compliant

Sentiments on data across the NSF BIO Centers  
(BEACON, SESYNC, NESCent, iPlant, iDigBio, NIMBioS)

## Carpentries Network Challenge!

- What are your (known) skills needs?
- Let's create a sustainable capacity development network
- Together, let's build a worldwide Carpentries community across collections

## Data and Technology Leadership

- Museum **Administration Support** and **Vision** for Digitization
  - staffing
  - care, linking, and feeding of digital assets
- Leadership recognizing
  - new and changing roles
  - professional development needs
  - power of speaking with one voice

Data Stewards needed for data leadership for collections of the 21<sup>st</sup> century

# Data and Technology Leadership

## Global Benchmark Challenge!

- Use ALA **Digitization Maturity** Model for Organization-level **Metrics**
  - organization-level digitization guidance
  - *compare across organizations*
  - opportunity to evaluate collectively

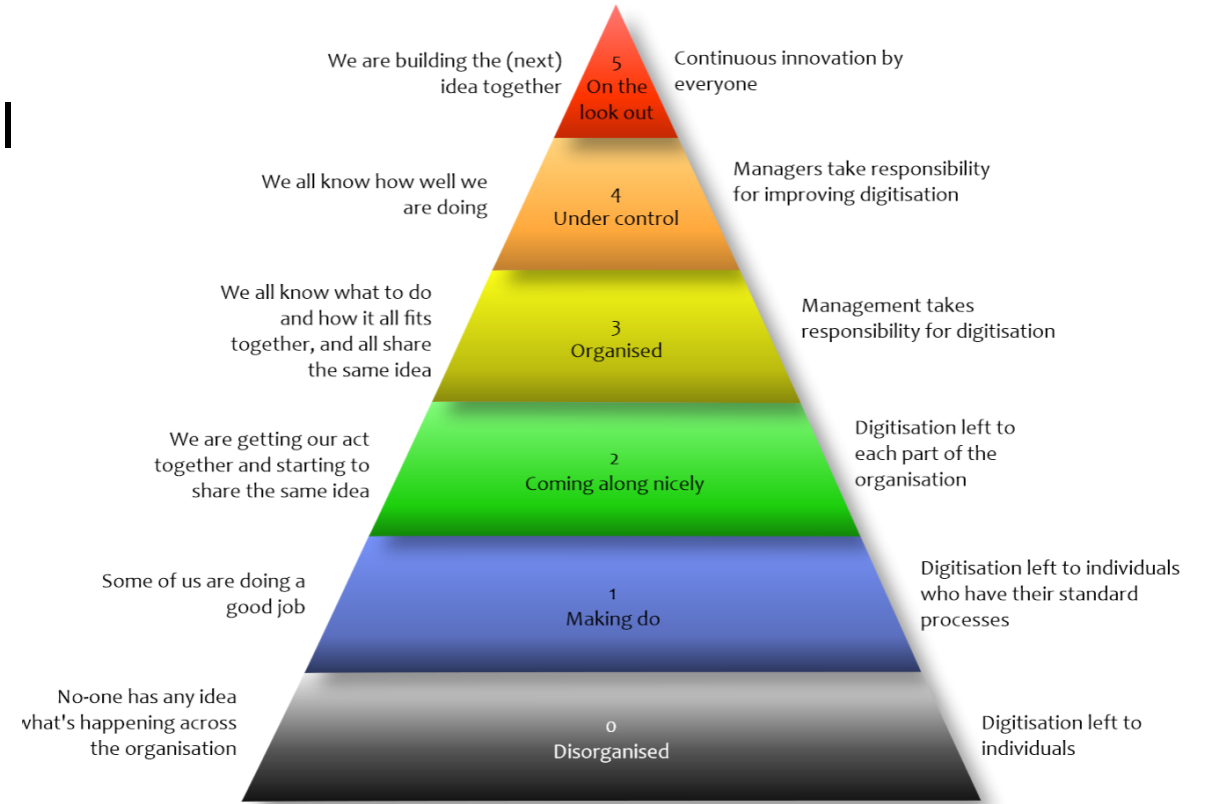

Figure 4 Digitisation maturity model

## Metrics and Benchmarking in Demand

- 90% of the respondents want to learn more about what metrics other institutions are using
- Does your collection have a strategic plan with clearly defined benchmarks and goals?
- **Metrics Interest Group?**
- **Metrics Workshop?**

#	Answer	%	Count
1	No	26.87%	18
2	Yes, our collection has a formal strategic plan.	17.91%	12
3	Our collection is encompassed into a larger strategic plan involving multiple collections.	13.43%	9
4	Our collection is subsumed under our institution's strategic plan.	34.33%	23
5	Other. Please explain.	7.46%	5
	Total	100%	67

## Duplication of Effort Challenge!

### the collection's point-of-view

**Deborah Paul**  
@idbdeb

1/ when [#digitizing](#) [#biocollections](#) we note much [#duplication](#) of effort. Everyone's got a [#people](#) table in their database. Hmm. How can we share more effectively? [@AllianceforBio](#) [@iDigBio](#) [@arctosdb](#) [@taxonbytes](#)

**mobilise**

Does Biodiversity Informatics ❤️ Wikidata?  
Does Biodiversity Informatics love Wikidata?  
[data-blog.gbif.org](https://data-blog.gbif.org)

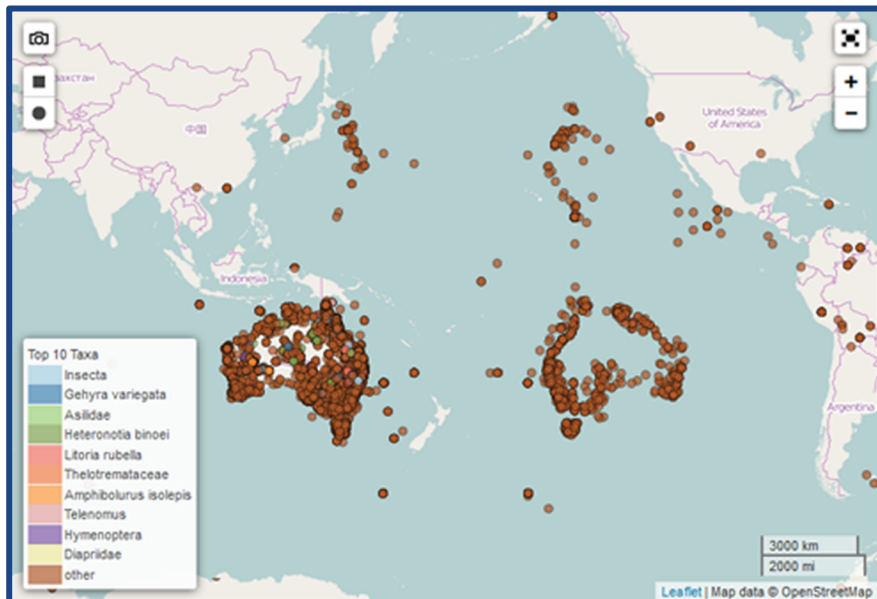

- taxon names
- people names
- localities
- publications
- trait data

# How do you assess / address data fitness?

- time (date)
- locality
- place

Hannah Frost

@feefifofannah

Following

From a [@HydralnABox](#) interview: "People will put anything and their dog in the date field. It's absolutely astonishing."

A screenshot of a web form with a dropdown menu. The form has three sections: 'Country', 'List', and 'Family'. The 'Country' section has a text input field with 'united k' and a dropdown menu showing suggestions: 'united kingdom', 'united king', 'united kingdom (england)', 'united kingdom (scotland)', 'united kingdom (wales)', 'united kingdom [?]', 'united kingdom of great b', and 'united kingdom?'. The 'List' section has a text input field with 'List' and a dropdown menu showing suggestions: 'List', 'List (england)', 'List (scotland)', 'List (wales)', 'List [?]', 'List of great b', and 'List?'. The 'Family' section has a text input field with 'Family' and a dropdown menu showing suggestions: 'Family', 'Family (england)', 'Family (scotland)', 'Family (wales)', 'Family [?]', 'Family of great b', and 'Family?'. The dropdown menu for 'Country' is open, showing the suggestions. The 'united kingdom' suggestion is highlighted in blue.

## Data Fitness Standard Tests

- Tests / fitness measures developed
- Aggregators ALA, GBIF, iDigBio, and DiSSCo agreed to implement

## Collection Management Software Developer Challenge!

*Let's embed them in local collection management software*

Figure 1.

Developing Standards for Improved Data Quality and for Selecting Fit for Use Biodiversity Data. ~ Biodiversity Information Science and Standards.

Chapman, A.D., Belbin, L., Zermoglio, P.F., Wieczorek, J., Morris, P.J., Nicholls, M., Rees, E.Rr, Veiga, A.K., Thompson, A., Saraiva, A.M., James, S.A., Gendreau, C., Benson, A., Schigel, D. (2020). 4: e50889.
